RodRozen Designs is tailored to textile lovers

Fabric is all around us: we wear it, we sleep on it, we sit on it and, above all else, we see and touch it. Ask any textile lover and they will tell you that they touch everything.

A fabric's feel plays an important part in deciding how to style our homes. Its design, colour and texture shape how it will be incorporated to create visual harmony and interest.

Whether you like a monochromatic colour scheme or blasts of colour, focus on texture and don't be afraid to play with a little bit of pattern.

When choosing a fabric, consider the function it will play in your space. If you're sitting on it, choose something durable that will last. If you will be sleeping on it, make sure you'll like the feel of it on your skin. And if you're accessorizing with it — go wild!

Fabrics enhance a room's décor and create soft and easy lines. By incorporating various textures, you not only create visual interest, but add depth and creativity to your design.
